How does the program work?

With virtual, blended, and face to face delivery options, Your Leadership Experience takes leaders through three key phases:

- **Learning:** Leaders develop self-awareness of their own personality preferences, leadership styles and team impact, in addition to building a better understanding of their role and how it supports your organization’s strategy.

- **Developing:** Individuals deepen and broaden their understanding of themselves as leaders by putting these new concepts and insights into practice. This helps them to plan out how their leadership could look like in the future.
- **Activating:** This final phase is all about making the learning and development stick and ensuring your leaders are applying their new skills back in the workplace.
